Good Afternoon:

I wanted to touch base with the group to see if there are any questions since our meeting a few weeks ago. We did not find any elevated gamma readings in areas other than those that were already identified (Areas 1, 2, 4). The perimeter fence was completed around Area 1. We put high visibility fencing around areas 2 and 4. Please continue to keep workers out of that area.

Attached are figures depicting the Gamma scans we conducted at the end of April. Included is a general overview of the investigation area and maps of the specific targeted areas (Area 1, Area 2, Area 3, Area 4, Area 5, and Area 6). These maps are in draft form and are intended to be used for general field/planning purposes, please do not distribute.

My public affairs office has been contacted by Dan Telvock (Investigative Reporter). They requested that Mr. Telvock present questions ahead of time prior to an in person interview with me on my next visit to Niagara County. This will most likely be when we start at our other site on Niagara Falls Boulevard. That visit is not scheduled yet but I wanted the group to know that is how we are handling the situation. I will let you know if and when the interview is scheduled.

Regards,

Eric
